Design and equipment list provided as a reference.

Exact equipment and quantities will need to be determined as required for actual space.

Mounting accessories and non-Bose components will need to be provided for a complete and functional system.

COMPLETING THE DESIGN

1 What color loudspeakers and user controls are required?

2 Are the ceilings finished or open?

- Gypsum ceiling not complete, include rough-in pans
- Gypsum ceiling complete or drop tile ceiling, include adjustable tile bridges (adjustable tile bridges are included with the DesignMax in-ceiling loudspeakers)

If open ceiling utilize the pendant mount accessory.

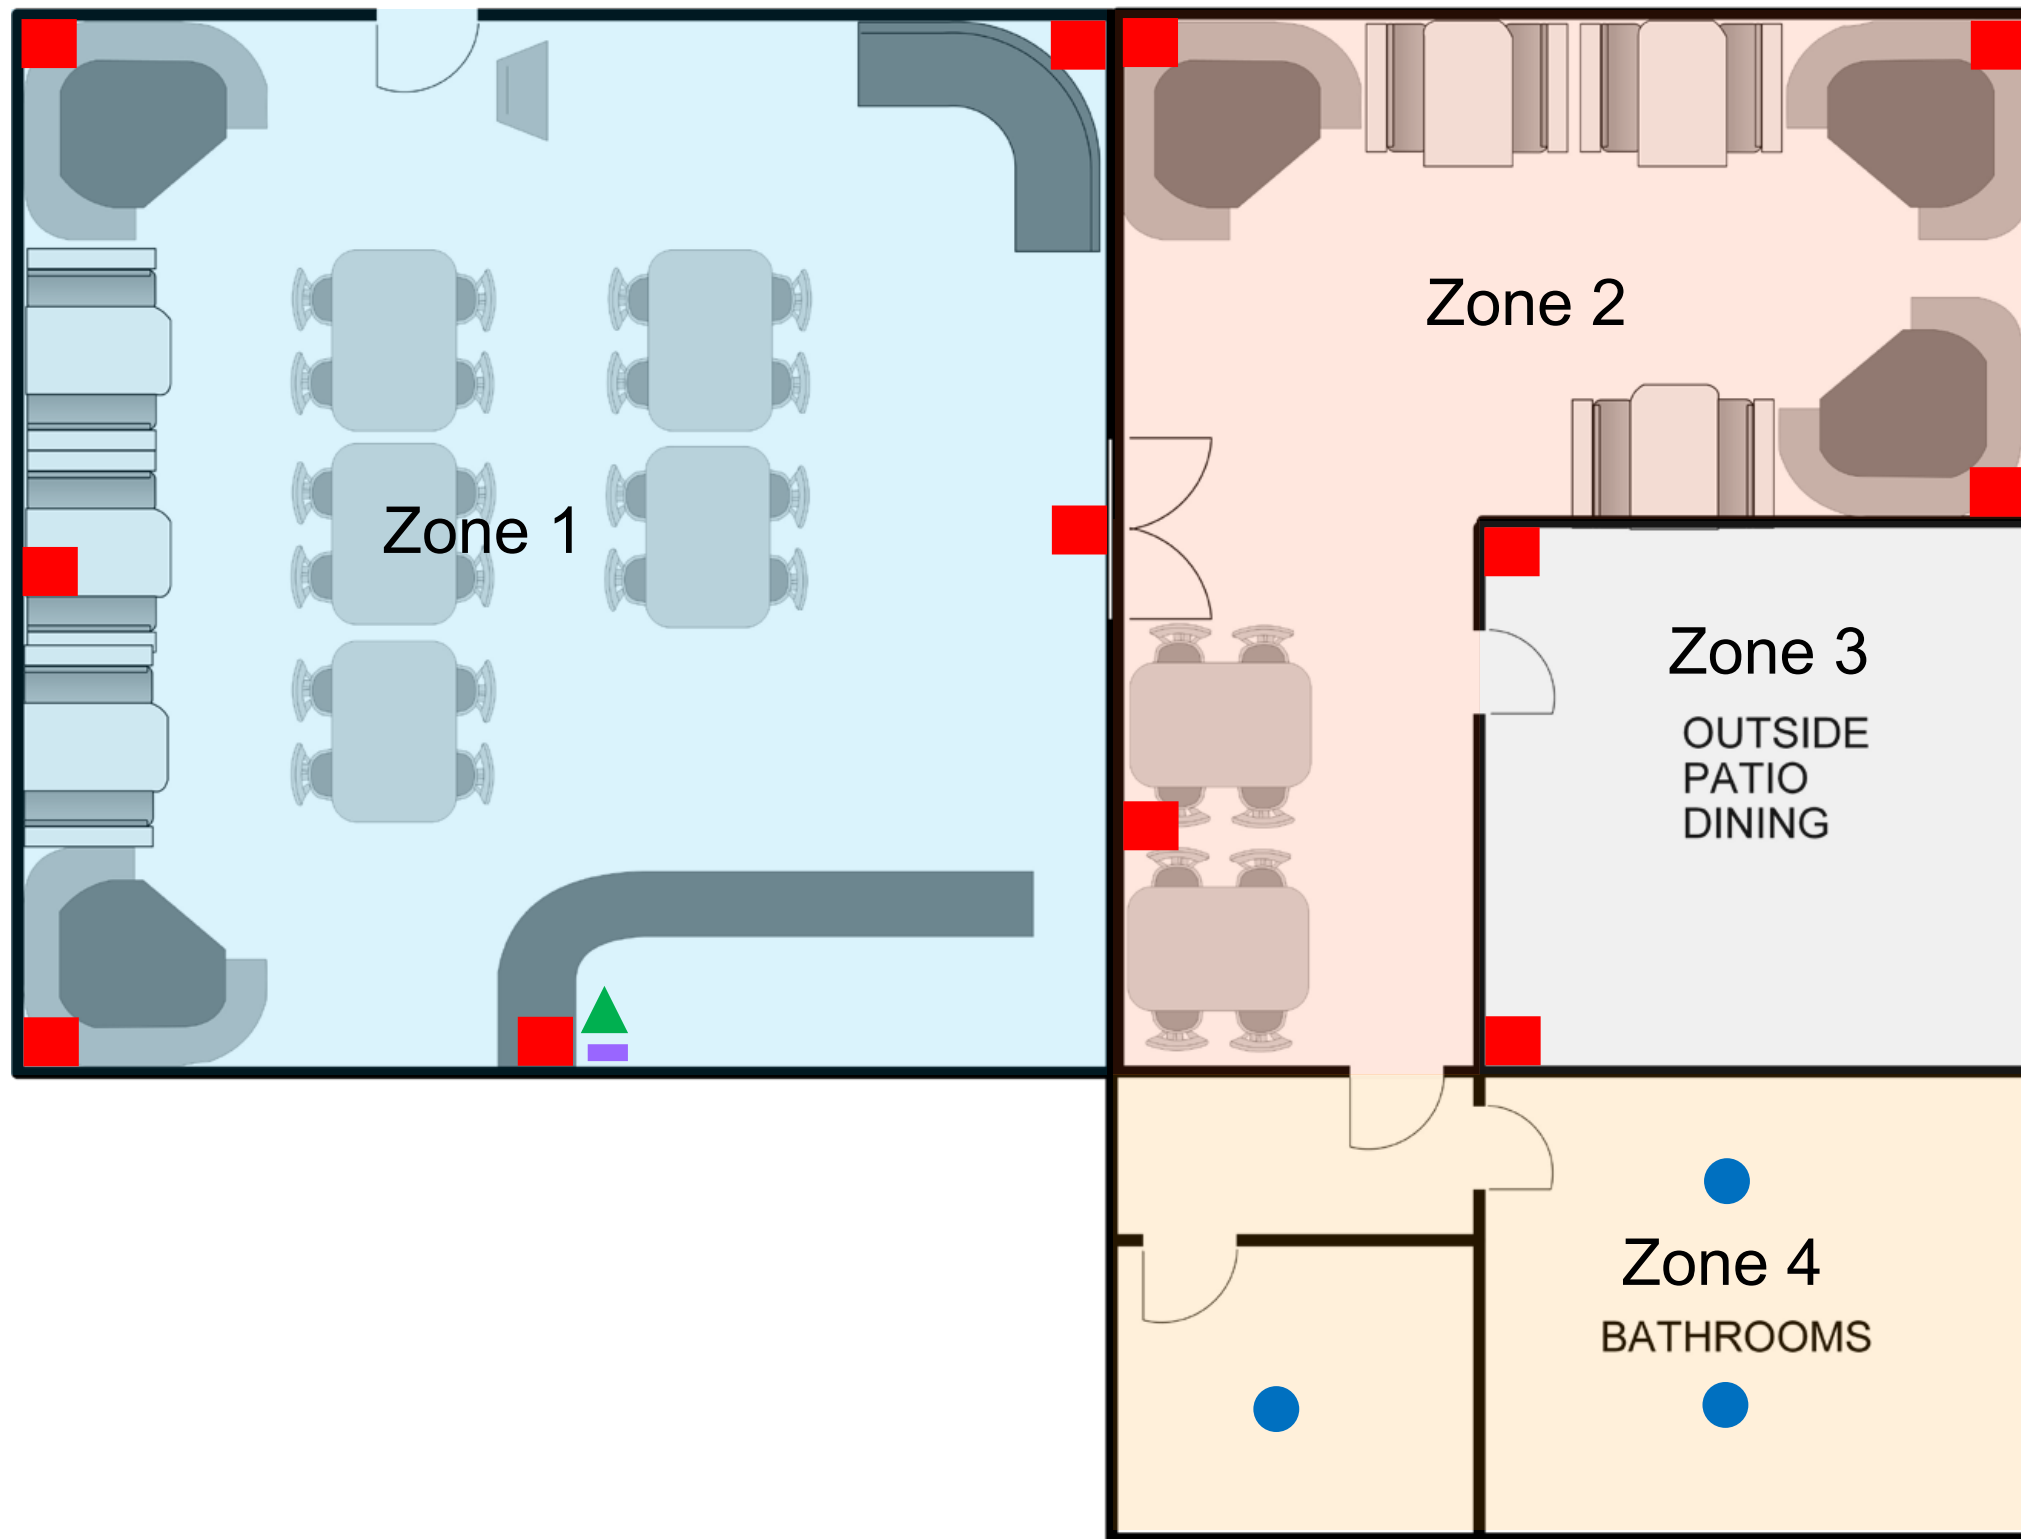

3 Confirm the input requirements and the output zones.

COMPLETING THE DESIGN

1 What color loudspeaker is required? White grill included. Black is an option.

2 What color is needed for the user controls?

3 To select your mounting accessories; Are the ceilings finished or open?

If finished are they gypsum or drop tile?

- Gypsum ceiling not complete, include rough-in pans
- Drop tile ceiling, tile bridges are included

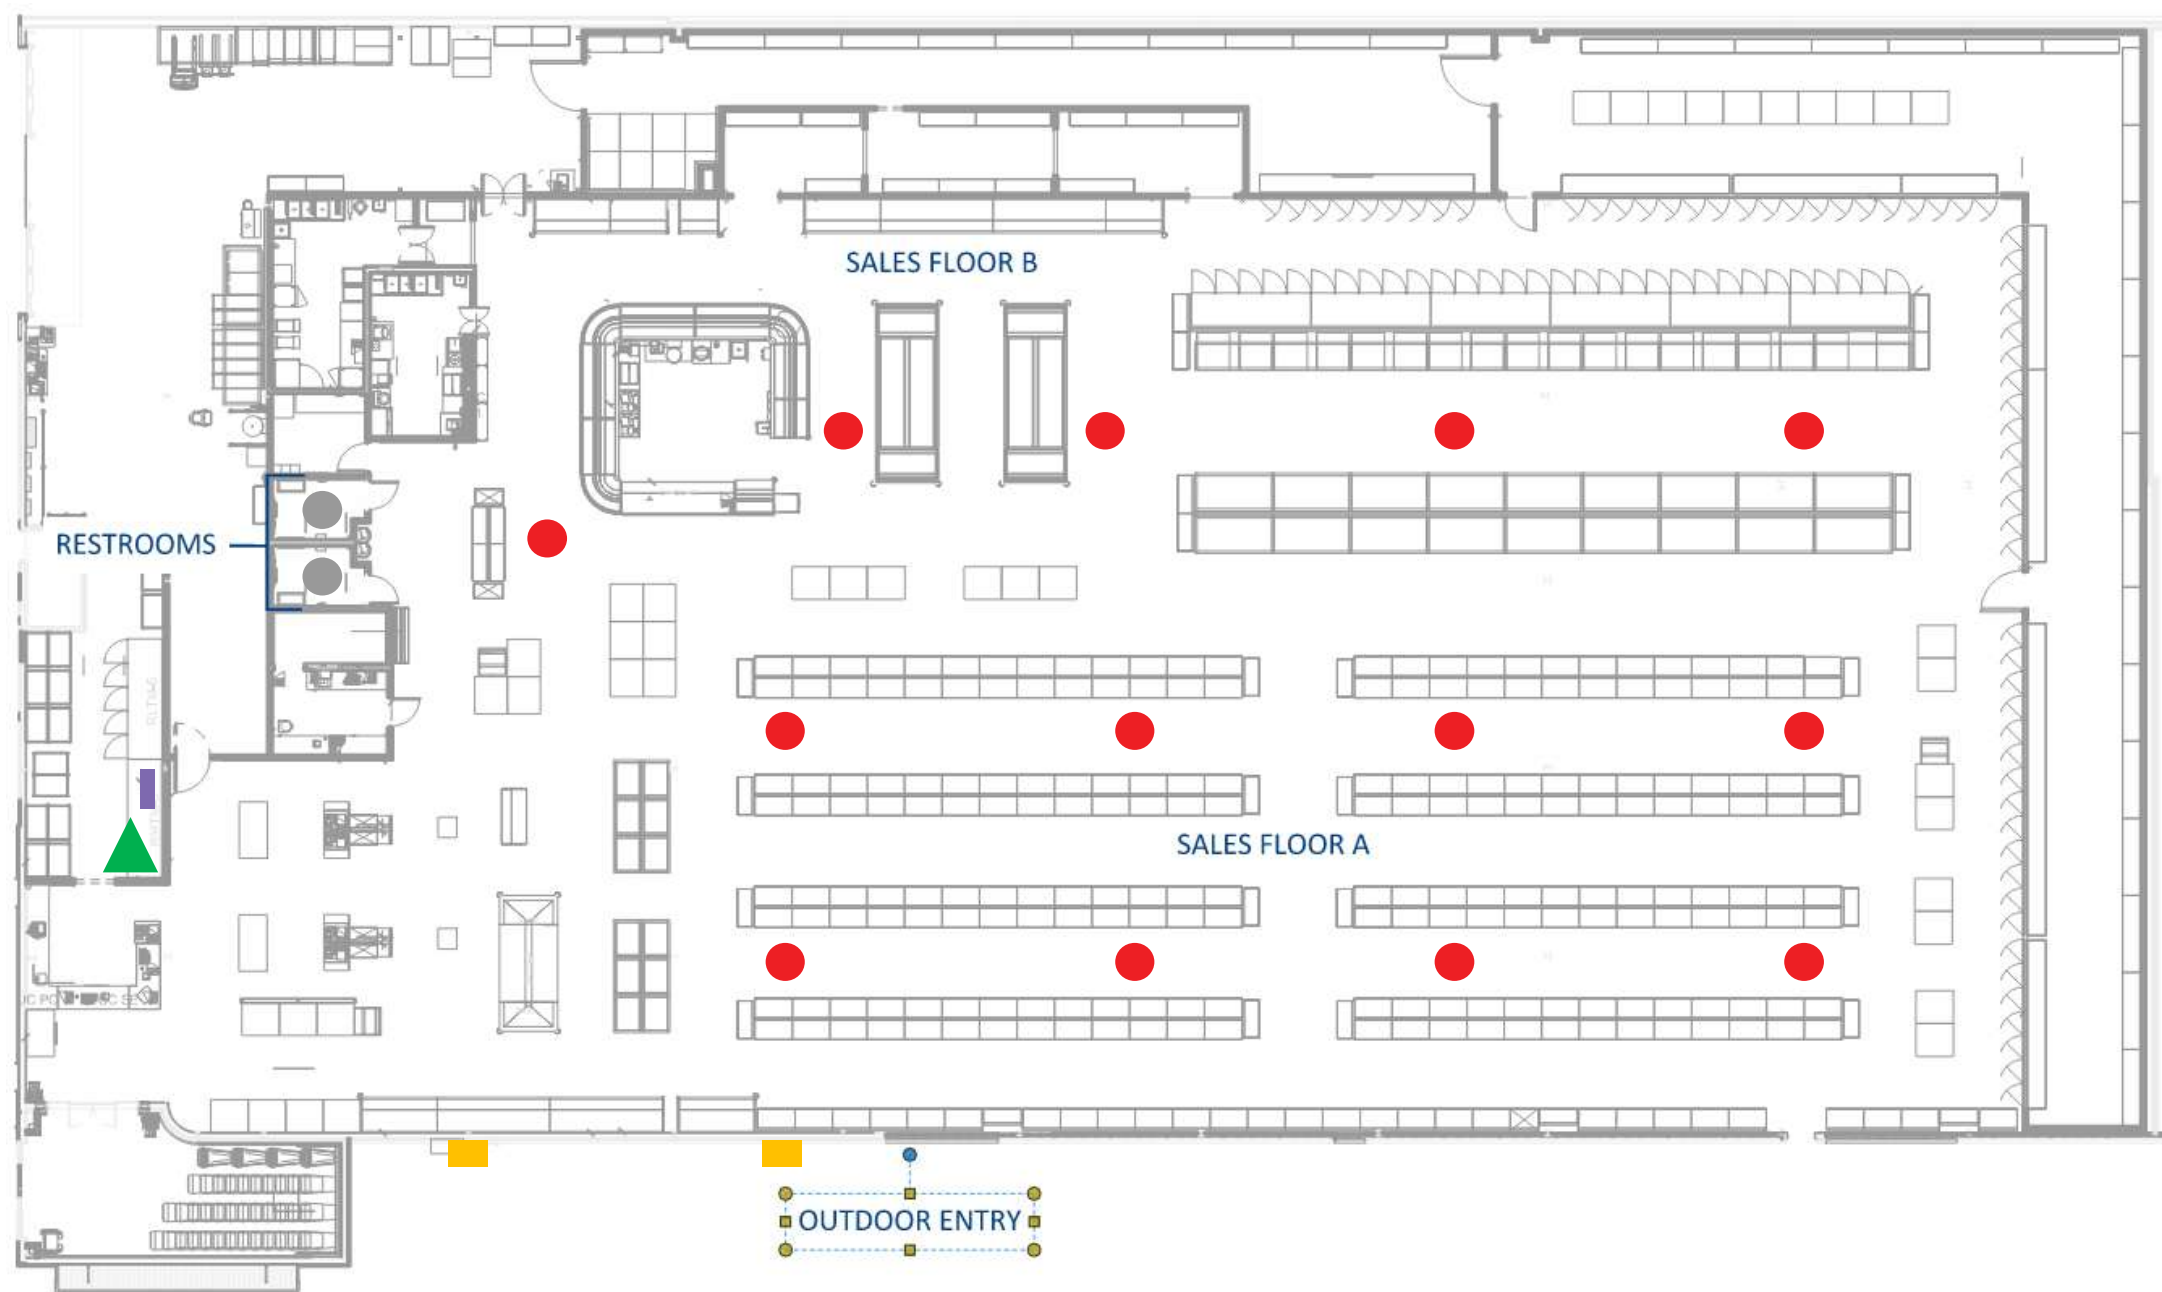

4 Confirm the input requirements and the output zones.

	PM4500N (361813-1110)	PowerMatch PM4500N	1
	CC-64 (41760) CC-PS1 (371407-0010)	ControlSpace CC64 with Power Supply	1

Design and equipment list provided as a reference.

Exact equipment and quantities will need to be determined as required for actual space.

Mounting accessories and non-Bose components will need to be provided for a complete and functional system.

COMPLETING THE DESIGN

1 What color loudspeaker is required?

2 Confirm that the column line array loudspeakers will not require pitch.
If the site has either of the scenarios described below, contact your Bose Representative to confirm design.

- Large hard surface at the rear of the listening area that the speakers are firing at directly. This may cause late-arriving reflections which adversely affect intelligibility.
- Obstructed “line-of-site” coverage to listening area. If a listener will not be able to see the loudspeaker they will likely not have clear audio.

3 Confirm that the MB210 is placed on the floor or mount using included U-Bracket.

4 Confirm the input requirements and the output zones.

For technical support call: **1-800-994-BOSE**

TABLE OF CONTENTS

PERFORMING ARTS/AUDITORIUM

PERFORMING ARTS/ AUDITORIUM LAYOUT

Performing Arts/Auditorium

- Raked seating area
- Mid-band reverberation time (RT₆₀) < 1.5
- 45-feet to furthest listener
- AMM112 for full-range speech and music applications
- AMM112 + SMS118 for extended range music systems
- Distributed mono system—delay outter two cabinets to minimize interference in seating areas

LEGEND

- AMM112 Multi-purpose Loudspeaker
- Optional ShowMatch SMS118 (flown behind center loudspeaker)
- ▲ Rack/Amplifier
