GASTRONOMY

OUTSTANDING SOUND QUALITY
AND EASY TO OPERATE.

Offer your guests an experience they will never forget

Atmosphere to enjoy and linger a while

Outstanding sound quality accentuates the atmosphere of your business and creates a close connection with your guests. The music you play makes you unmistakable to your target group. This is equally true for restaurants or bars playing discreet background music, and for bistros and clubs in which a louder volume helps to create the right vibe. Our audio solutions ensure that your guests feel right at home from the moment they enter your venue.

Easy for your staff to operate, flexible options for any space

Your staff should be able to focus fully on the needs of guests and not waste unnecessary time on operating or fixing faults with the audio system. Our business music systems with their intuitive operation and smart, automated settings attuned to your needs will impress not only your guests, but your staff too.

Expert planning

Delivery of preinstalled, ready-to-connect device technology by Bose Professional partners.

Preparation of detailed wiring diagrams by Bose Professional partners.

Easy to select signal source, volume and audibility range in the app or on a wall panel.

System solutions for catering establishments

Background and foreground acoustics

DESIGNMAX

Outstanding sound, discreet design: DesignMax systems can be used to deliver applications on any scale and to satisfy every performance requirement. DesignMax loudspeakers offer rich lows and clear highs at any volume.

The loudspeaker systems are available as in-ceiling, surface-mounted or pendant versions in black, white and with a surface that can be painted. A range of accessories allow them to be installed anywhere.

EDGEMAX

These in-ceiling loudspeakers are designed specifically to be installed in corners and along the edges of rooms. Their defined sound dispersion of 90° or 180° makes them ideal for smaller areas or for installation above monitors/screens, for example.

EdgeMax – award-winning technology now also available with an installation depth of just 10 cm.

FREESPACE 360P

The loudspeaker system with 360° coverage for garden and outdoor areas.

Dancing and live music

AMM MULTIPURPOSE LOUDSPEAKERS POWERSHAREX AMPLIFIERS

The AMM systems feature a passive, coaxial two-way design and can be used in PA, monitor and delay applications. The AMM line is comprised of two full-range loudspeakers and a subwoofer which require a DSP or Bose Professional power amplifier with DSP. High power and our Beamwidth Matching Waveguide technology create an exceptionally powerful sound experience for performers and audiences.

Portable event acoustics

S1 PRO+ AND L1 PRO

Want to give a speech on the terrace or play a song in the bar? The systems have an integrated mixer, offer *Bluetooth*® streaming and are ready for use in no time. The wireless S1 Pro+ has a lithium-ion battery with an extra long running time of up to 11 hours.

The Bluetooth® word mark and logos are registered trademarks of Bluetooth SIG, Inc.
