RETAIL

EXCELLENT SOUND, OUTSTANDING QUALITY
AND EASY TO OPERATE.

Sound that means business

Atmosphere to shop and browse

Your store will always have at least one significant advantage over online shopping – it offers customers an authentic shopping experience with personal service, products they can touch and a unique ambiance. With our business music systems, you can create an inviting atmosphere in your shop that your customers will want to visit again and again.

Systems that blend in so your brand stands out

Our solutions put your brand in the forefront, not ours. From volume that adjusts itself, to built-in enhancements that ensure the system sounds great at any level, to thoughtfully designed loudspeakers that blend in with any décor.

Scalable solutions to fit your budget and space

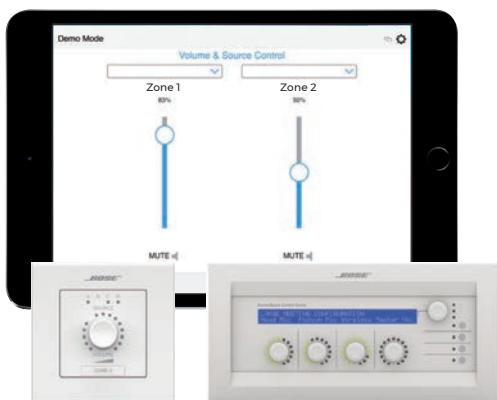

No matter if you're starting small, going big, or already a household name, we've built a flexible range of solutions to fit virtually any budget and space – even portable sound systems that set up at a moment's notice to deliver great sound, whether it's a celebrity autograph signing or designer trunk show.

Better operational experience for your staff

Your staff should be focused on customers, not learning or troubleshooting audio equipment. Our business music systems provide a better experience for your employees too – with intuitive controls and smart, automated settings that can be tailored to your needs.

Easy to operate

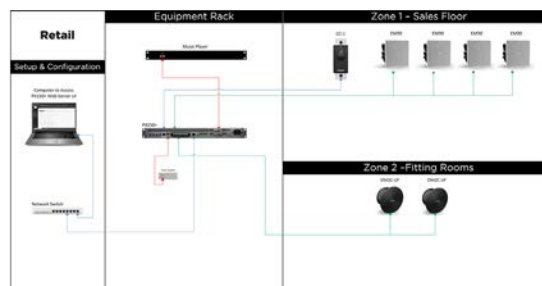

CONTROLCENTER

Easy to select signal source, volume, and audibility range in the app on the mobile device. Or on a wall panel.

Bose Professional know-how

DESIGN AND INSTALLATION SUPPORT

Preparation of detailed wiring diagrams by Bose Professional sellers.

Delivery of pre-assembled, ready-to-connect device technology by Bose Professional sellers.

System solutions for commercial spaces

Excellent sound

DESIGNMAX

The DesignMax loudspeakers were developed specifically for commercial use. Outstanding sound, unobtrusive design and maximum modularity characterize the entire product range.

DesignMax systems can also be connected directly to existing central amplifiers or used as a replacement for existing speakers for a better sound experience.

All loudspeaker systems are available as in-ceiling, surface-mounted or pendant versions in black, white and with a surface that can be painted. A range of accessories allow them to be installed anywhere quickly.

SOLUTIONS

Front control for rapid, secure setup of installed systems.

EDGEMAX

These in-ceiling speakers are designed specifically to be installed in corners and along the edges of rooms. Their defined sound dispersion of 90° or 180° makes them ideal for smaller areas or for installation above monitors/screens, for example.

EdgeMax – award-winning technology now also available with an installation depth of just 10 cm.

CSP - COMMERCIAL SOUND PROCESSORS

Bose Professional sound processors provide a comprehensive solution for commercial applications with loudspeakers, controls and software to efficiently set up high-quality sound systems. They enable quick configuration via a browser-based interface and offer features such as AutoVolume, Opti-Voice Paging and SmartBass for optimized sound quality. With a wide range of connections, easy network integration and optional control options such as the ControlSpace Remote app, they offer user-friendly control and reliable performance.

Mobile event acoustics

S1 PRO+ and L1 PRO FAMILY

Celebrity visit, performance or reading? No problem! The ultra-compact Bose S1 Pro+ is set up and ready to operate in a matter of seconds.

All systems have an integrated multi-channel mixer and offer *Bluetooth*® streaming. The wireless S1 Pro+ has a lithium-ion battery with a running time of up to 11 hours.

The L1 Pro systems are ideal for DJ or live performances, even in front of a larger audience.

The *Bluetooth*® word mark and logos are registered trademarks of Bluetooth SIG, Inc.

System solutions for commercial spaces

SHOP & STORE | MALL & MARKET | OUTLET | FLAGSHIP | FOOD

Bose Professional business music systems are used in stores belonging to major retail chains and those owned by private individuals all over the world. Excellent sound and products that have been developed specifically for such applications along with a comprehensive service concept are the key reasons why these systems are so prevalent.

Bose Professional designs system solutions for every budget and performance class.

"Premium" System ★

Background music with even dispersion of sound to create a positive atmosphere in the shop.

"Excellent" System ★★

Background acoustics with excellent sound quality for low to medium volume.

"Superior" System ★★★

Sound system with a high level of power for foreground music with a real club atmosphere.
