BOSE S1 PRO+ wireless PA system

# Instant atmosphere. Anywhere.

Battery powered | *Bluetooth*® connectivity | Wireless transmitters  
Smartphone control | Onboard mixing

Versatile, portable, powerful — the S1 Pro+ offers a world of possibility for your customers, especially hospitality and higher education. A fully wireless, ultra-portable PA powerhouse, it's a breakthrough temporary audio solution that is an easy addition to your installed audio offerings.

The S1 Pro+ delivers amazing performance in a compact, lightweight design, with a simple setup made even easier thanks to optional wireless microphone and instrument transmitters (sold separately). S1 Pro+ is the ideal PA system for a wide range of institutional applications — adding instant atmosphere and energy to any space, event, or gathering.

## APPLICATIONS

Lobby gathering  
Outdoor garden party/wedding  
Tailgate/pep rally  
Awards ceremony  
Small lecture hall/auditorium  
Multipurpose spaces  
Fitness centers

## Professional, wireless, portable sound for any space.

Rugged, lightweight and ultra-portable, the S1 Pro+ is designed for durability and easy transport using the convenient carry handle. And it's ready for any event with four positioning options and Auto EQ, which senses the orientation to adjust settings for optimal performance.

-  **High-output sound** from a small, lightweight, ultra-portable system
-  **No external power required** — rechargeable lithium-ion battery provides up to 11 hours of play time on a single charge\*
-  **Go fully wireless** with *Bluetooth* connectivity, mobile streaming, and optional wireless microphone and instrument transmitters
-  **Built-in three-channel mixer** offers ToneMatch, reverb, and EQ controls

### No cords. No cables. No problem.

Exclusive to S1 Pro+, optional XLR and instrument wireless RF transmitters simplify your setup further by eliminating cables. They easily pair with the system's integrated wireless RF receivers and store neatly in the loudspeaker and charge when not in use.

\*As with any battery-operated device, battery performance can vary based on a number of different factors. These include the type of content being played, the volume at which it's played, and the surrounding temperature. The Bose S1 Pro+ wireless PA system was rigorously tested and verified to provide up to 11 hours of battery life while playing music at room temperature from Spotify's Global Top 50 at a comfortable volume that you can talk over while listening indoors. A singer/songwriter performing indoors for up to 100 people can expect to get 5 hours or more of battery life at performance-volume levels.
