

The Bose logo is displayed in a white rectangular box in the top left corner of the advertisement. The logo itself is in a bold, italicized, sans-serif font.

**SUB1 & SUB2**  
POWERED BASS MODULES

**Slim size. Big bass.**

### **Bass without the bulk**

Sub1 and Sub2 powered bass modules combine with virtually any portable PA to deliver low end down to 40 Hz and 37 Hz, respectively. When paired with the Bose L1 Pro32, Sub1 creates a more compact system while Sub2 plays lower and louder. And both give you bold bass from slim design that goes virtually anywhere.

**Big bass from the stage.  
Practical portability everywhere else.**

With a unique RaceTrack driver design, Sub1 and Sub2 offer powerful bass and an optimized center of gravity. The driver's shape allows the physical enclosure of Sub1 and Sub2 to be slimmer without compromising sound. This frees up room in your vehicle and on the stage, and makes every carry in between — home to car, vehicle to venue — much easier.

Sub2

Conventional 15" subwoofer

**Sub1**

**Give your songs full impact**

More portable  
Low-end range down to 40 Hz  
7" x 13" high-excursion  
RaceTrack driver

**Sub2**

**Give the dance floor a pulse**

More powerful  
Low-end range down to 37 Hz  
10" x 18" high-excursion  
neodymium RaceTrack driver

**SubMatch connectivity**

Combine seamlessly with Bose L1 Pro32 portable line array via proprietary SubMatch connectivity, which delivers both power and audio over a single cable; link up to two powered bass modules to a single L1 Pro32.

**Cardioid Mode**

Stack two Sub1 or Sub2 subwoofers for even more bass or unleash Cardioid Mode for focused, directional performance that negates rear-firing bass energy, steers the bass out front, and reduces feedback.

**Combine with virtually any portable PA**

Pair with other powered loudspeakers via line input and output with selectable crossover modes, plus integrated threaded pole mount for use with Bose S1 Pro PA and more.
