SUPPORT FOR CONSULTANTS AND AV TECHNICIANS

DesignMax, EdgeMax, FreeSpace, voice alerting

MSA12X, AMM multipurpose loudspeaker, ArenaMatch, ShowMatch

## Bose Professional brings unforgettable moments alive

**It's that moment.** The one when the featured act brings everyone to their feet during the show's encore. Or when the worship team rises to its powerful crescendo and moves the entire congregation. And it's the key moment during a conference call that connects and unites a work team from around the globe.

Pro audio is about building incredible experiences, one piece at a time.

### Innovation begins with research

People in the pro audio industry identified unique problems: complex acoustic challenges, the lack of diverse connectivity options, and sophisticated signal processing concerns. The result wasn't a new product – it was an entirely new division dedicated to solving pro audio problems: Bose Professional.

### Simpler designing of complete systems

Tailored solutions that work. Our expanded product range facilitates custom-designed systems with zero compromises for a variety of applications.

### Simpler installation for system integrators

For faster order processing and fully satisfied customers. The expanded product offering from Bose Professional has been specially developed for seamless compatibility – and can be easily combined with other systems.

### Better sound experience for customers

Ensure premium sound, better clarity and a more welcoming ambiance, whether in a hotel, university, showroom, event site or a place of worship.

### Bose Professional software solutions

We support you in system design and in developing operational concepts with our software solutions for electro-acoustic simulation and system programming.
